

1985 EDITORIAL INDEX

Articles by author and subject

AUTHORS

Adams, Jr., Paul
Intereffects of Refrigeration
in Supermarkets, 10/38

Alereza, Taghi
Validation of an Hourly Microcomputer
Program with Leonard Hovander, 12/34

Azer, N.Z.
Spot Cooling Systems, 6/40

Baillie, John D.
Microprocessor Control of a Refrigeration
System with Philip L. Langford, 9/22

Boggs, Andrew T.
The ASHRAE/ARI Expo, 6/22

Buckley, Jack B.
High Rise Fire Safety Systems, 4/26

Coad, William J.
Hydronic Energy Economics, 6/52

Crawley, Drury B.
Standard 90: The Value, with
Robert S. Briggs, 11/18

D'Artagnan, Samuel
The Rate of Temperature Pulldown, 9/36

Diamond, Stephen C.
The DOE-2 Validation in Computer
Modeling with Bruce D. Hunn and
Charlene C. Cappiello, 11/25

Dillon, Michael E.
Con: Some Reasons Not to Integrate
with EMCS, 4/36

Gas Research Institute
The Quest for Smaller Units
in Cogeneration, 7/18

Hackner, Richard J.
System Dynamics and Energy Use with John
W. Mitchell and William A. Beckman, 6/29

Hite, Rodney R.
A Cogeneration Design Concept for Caltech
with George M. Fielding, 7/24

Huber, Walter T.
Piping Systems are the Key
in District Heating, 2/27

Hughes, H. Michael
A Parameterized Cost Model
for Heat Pumps, 8/36

Johnson, Greg A.
A Constant Air System to VAV, 1/106

Jordan, Carl H.
The Pacific Bell Complex with
Makio Goto, 12/20

Kao, James Y.
Sensor Errors in VAV Systems, 1/100

Klim, Michael S.
Society Seeks Added Women and
Minority Participation, 12/64

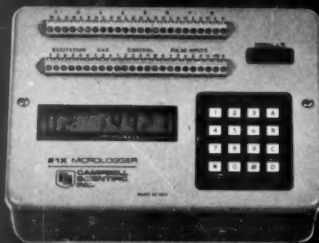

Klote, John H.
Smoke Control in VA Hospitals, 4/42

Kosla, Lee A.
Cogeneration Fills San Jose Needs with Stan
H. Shepherd and Henry S. Orbach, 7/30

Lavender, R. Jerald
The Role of Site Measurement with
David Lavender, 12/30

Murphy, David A.
The Interface Between Refrigeration
Engineers, 9/28

Introducing The 21X Micrologger

A small, powerful datalogger for analysis of HVAC and solar equipment, photovoltaics, building design and materials.

- Flexible programming from keyboard or serial port allows real-time processing and control.
- Input/output temperature and flow measurements processed on-line for BTU monitoring.
- 16 analog and 4 pulse counting inputs; 2 analog outputs for control or strip chart recording; 6 digital control outputs.
- Resolution of 0.05° C on thermocouples; direct compatibility with RTD's; pressure sensors, magnetic AC or contact closure flow meters.
- Internal memory storage with on-line or interrogated transfer to cassette tape, printer, modem or computer.
- Typical 6 month operation on 8 D cells (rechargeable option) over a -25° C to +50° C range.

ASHRAE JOURNAL December 1985

Mechanical & Electrical Design Computer Software

- † HVAC Load Calculations. Exact 1985 ASHRAE Procedures
- † Building Energy Analysis
- † Fire Sprinkler Design
- † Short Circuit Calculations
- † Static Regain Duct Sizing
- † IES Lighting Calculations
- † Residential HVAC Loads
- † Job Cost Accounting
- † Operates on all Micro's using CP/M* or MS-DOS*
- † Hardware and Software Installation Consultation

Elite Software

Call or send for a complete brochure. Ask about our \$38.00 demonstration disks. Demo's are available on HVAC, Energy, Duct Sizing, Fire Sprinkling, Lighting, Short Circuit, Voltage Drop, Life Cycle & others.
